Help Enhance Productivity & Cyber Security with the Latest Metasys Software

Metasys Software Modernization Promotion

Avoid the inefficiencies of older building automation software by making sure your Metasys software is up to date. Upgrading also eases integration with new technologies and components, and helps reduce the risk of security breaches. This promotion includes opportunities to trade up from the Site Management Portal to the Metasys user interface. Upgrading is easier than ever—especially with Metasys UI implementation options to fit your budget.

The power behind **your mission**

Johnson Controls

Modernize Software, Gain Key Benefits

The latest Metasys software helps you protect data and work smarter:

· Fault Detection & Fault Triage suite helps even inexperienced staff prevent and fix issues, minimize energy waste and avoid comfort complaints

· Intuitive navigation by building space clarifies equipment relationships for faster troubleshooting and less time on task

· Work from anywhere, on any device, using the fully mobile-optimized interface

· Alarm Manager helps quickly identify and prioritize alarms, for faster troubleshooting

· Photo-realistic graphics offer cleaner visualization, right from your mobile device. A built-in graphics manager eliminates the need for separate tools to create or edit graphics.

· Security enhancements use IT best practices—including password management and secure, encrypted communications—to help prevent unauthorized access

· Key user account and system information in the award-winning Cyber Health Dashboard helps system administrators understand and address potential cyber security issues

Starting on the path to modernization now helps you manage the phaseout of the Site Management Portal (SMP). We can help you develop a cost-effective Metasys UI migration plan.

Scalable Metasys UI Implementation Options

Upgrading to a server platform brings you the advantages of the world-class Metasys user interface. Choose from two implementation options.

Essential Metasys UI. This out-of-the-box option is a great starting point, creating a familiar network view and requiring minimal configuration.

Optimum Metasys UI. Get all the Metasys UI benefits, including intuitive navigation by building space and equipment relationships. Make this option your ultimate goal to increase team productivity and building efficiency.

It's Time to Trade Up!
SMP Has Entered End-of-Support

SMP was first released in 2003. Like almost all technology released at this time, it has reached the end of its life.

· SMP entered end-of-support at Metasys Release 12.0, with no further software updates or patches.

· New installations must be installed with the Metasys UI, and existing sites with SMP require a license.

· Over 90% of critical SMP capabilities are available in the Metasys UI.

· Plus, Metasys UI is HTML5-compliant and not dependent on dated technology like Java or out-of-support Microsoft Silverlight (like SMP).

Trade up now and gain the ease and efficiencies of the Metasys UI.

A software subscription keeps your system up to date throughout the term of the subscription by providing the latest revisions of Metasys software.

Program Details

Metasys Software with Essential Metasys UI

· 20% off new Metasys upgrade or migration software
· 20% off new Metasys 1- or 3-year software subscription

Metasys Software with Optimum Metasys UI

· 40% off new Metasys upgrade or migration software
· 40% off new Metasys 1- or 3-year software subscriptions
· 40% off new Fault Detection software
· 40% off new Fault Triage software

Promotion valid through September 30, 2023. Contact your Johnson Controls representative for more information.

Terms & Conditions
1. Order must contain the following at time of purchase:
   - Upgrade software or migration software
   - Subscription, 1-year or 3-year
   - Fault Detection and Fault Triage for Optimum Metasys UI
2. Microsoft Sequel (SQL) software versions excluded.
3. Fault Detection and Fault Triage required to qualify for Optimum Metasys UI deployment level of cost optimization.
4. All subscriptions must be booked under a Planned Service Agreement (PSA).
5. Existing Planned Service Agreement (PSA) required.
6. Valid for existing Metasys customers only.
7. Current Metasys revision and existing software serial numbers required.
