

# A global brand leading the supply of environmentally safer refrigerants.

## Technical Expertise | Support | Retrofitting | Reclamation

York refrigerants from Johnson Controls are one of the key substitutes for CFC's and HCFC's, providing a sustainable, environmentally safer, nonozone depleting alternative that delivers comparable results in effectiveness as well as cost.

York refrigeration specialists served as long-term partners to client businesses, helping entities successfully make the transition to environmentally safer refrigeration and cooling products. The product line prepared for virtually every application in air conditioning and refrigeration, ranging from domestic to commercial and industrial uses.

**Comfort Air  
Conditioning**

**Vehicle Air  
Conditioning**

**Building Air  
Conditioning**

**Domestic  
Refrigeration**

**Industrial  
Refrigeration**

Refrigeration**

The power behind **your mission**

## R134a

1,1,1,2 Tetrafluoroethane  
(CH<sub>2</sub>FCF<sub>3</sub>)

### Applications

- Automotive industry – car AC
- Refrigeration Application
- Centrifugal cases
- Home refrigerators
- Supermarket cases
- Walk-In Refrigerators

## R404a

Pentafluoroethane,  
1,1,1-Trifluoroethane  
1,1,1,2-Tetrafluoroethane  
(CHF<sub>2</sub>CF<sub>3</sub>, CH<sub>3</sub>CF<sub>3</sub>, CH<sub>2</sub>FCF<sub>3</sub>)

### Applications

- Long term alternative to R502
- Refrigeration purposes
- Refrigerator vans & trucks

## R407c

Difluoromethane, Pentafluoroethane  
1,1,1,2 – Tetrafluoroethane  
(CH<sub>2</sub>F<sub>2</sub>, CF<sub>3</sub>CHF<sub>2</sub>, CH<sub>2</sub>FCF<sub>3</sub>)

### Applications

- Light Commercial Air-Conditioning
- Refrigeration Purposes
- Replacement of R22

## R410a

Difluoromethane, Pentafluoroethane  
(CH<sub>2</sub>F<sub>2</sub>, CHF<sub>2</sub>CF<sub>3</sub>)

### Applications

- Refrigeration Purposes
- Refrigerator Vans and Trucks

## R22

Chlorodifluoromethane  
(CHClF<sub>2</sub>)

### Applications

- Room Air Conditioners
- Commercial & Industrial Use
- Production of Fluoropolymers
- Blowing Agents in Rigid Form
